Technical founders build the numbers from the technology forward. Investors decide from the scaled business back.

For founders with proven tech, building the scale-up, raising within a year.

WHY IT MATTERS

Rounds rarely fail on the tech. They fail on the case: months lost, a lower valuation, or a polite “let’s stay in touch.”

1

STEP 1 · ENTRY

FIXED SCOPE

The Scale-up Case

4–8 weeks

Investor-ready for this round: premises, levers, risks, **in one business case.**

01	**Baseline**	In-person kickoff	What’s sold, not just built: pilots, contracts, runway. Model review · Contracted revenue · Burn rate
02	**Milestones**	Build + check-ins	One lever drives the plan, milestone by milestone. Pilot conversion · Sales cycle · Round sizing
03	**Scale**	Final session	From this round to break-even, risks named. Operating leverage · Capital efficiency · Downside scenarios

YOU GET

- The KPIs that drive break-even, tested at the edges
- A milestone plan: tech unlocks, sales cycles, rounds
- The next-round one-pager: round size, use of funds, runway

INVESTORS SEE

A clear ask · Milestones they can track · Risks upfront

2

STEP 2 · OPTIONAL
MONTHLY

Milestone Steering. Plans drift after the round. Your live KPIs turned into push-or-hold calls, until you make them yourself.

WHY BRUNO

5 years financial controlling at **BMW**, US to China.
Decision cases up to **€260M** in annual revenue.
On-site kickoff anywhere in Europe · EN / DE / ES
