Technical founders build the numbers from the technology forward. Investors fund from the exit back.

For portfolio founders past PMF, without a CFO, raising within a year.
When the story stops carrying the round, and the numbers have to.

WHY IT MATTERS

Founders pitch the technology. You end up rebuilding the case in DD, or passing on a good company that told it badly.

1

STEP 1 · ENTRY

FIXED SCOPE

The Scale-up Case

4–8 weeks

Your founder arrives DD-ready, **built in your due-diligence format.**

01	**Baseline**	In-person kickoff	What's sold, not just built: pilots, contracts, runway. Model review · Contracted revenue · Burn rate
02	**Milestones**	Build + check-ins	One lever drives the plan, milestone by milestone. Pilot conversion · Sales cycle · Round sizing
03	**Scale**	Final session	From this round to break-even and exit, risks named. Operating leverage · Capital efficiency · Downside scenarios

FOUNDER GETS

- The KPIs that drive break-even, tested at the edges
- A milestone plan to exit: tech unlocks, sales cycles, rounds
- The next-round one-pager: round size, use of funds, runway

INVESTOR GETS

Faster diligence · Board-level milestones · Risks upfront

2

STEP 2 · OPTIONAL
MONTHLY RETAINER

Milestone Steering. Plans drift after the round. Push-or-hold calls on what matters, until the founder steers alone.

WHY BRUNO

5 years financial controlling at **BMW**, US to China.
Decision cases up to **€260M** in annual revenue.
On-site kickoff anywhere in Europe · EN / DE / ES
