Technical founders build the numbers from the technology forward. Investors decide from the scaled business back.

For founders with proven tech and first paying pilots, raising within a year.

WHY IT MATTERS

Fewer than 1 in 7 European seed startups reach Series A. Many stall on a case investors can't decide on.

1

STEP 1 · ENTRY — FIXED SCOPE

The Scale-up Case — 4–8 weeks

Your assumptions, growth lever and risks, **in one case you can defend yourself.**

01	**Baseline** In-person kickoff	What's sold, not just built: pilots, contracts, runway.	Model review · Contracted revenue · Burn rate
02	**Milestones** Build + check-ins	One lever drives the plan, milestone by milestone.	Pilot conversion · Sales cycle · Round sizing
03	**Scale** Final session	From this round until the business pays for itself.	Margins as you grow · Cash to the next round · What if a pilot slips

YOU GET

- Your key KPIs, and what happens if a pilot slips
- A milestone plan: tech unlocks, sales cycles, rounds
- The next-round one-pager: round size, use of funds, runway

INVESTORS SEE — What it unlocks · Milestones to track · Risks upfront

2

STEP 2 · OPTIONAL MONTHLY

Milestone Steering. Pilots slip, burn drifts. Your live KPIs turned into push-or-hold calls, until you make them yourself.

WHY BRUNO

5 years financial controlling at **BMW**, US to China.
Decision cases up to **€260M** in annual revenue.
On-site kickoff anywhere in Europe · EN / DE / ES
